NOTE 1: A score system should be defined, e.g. 5 = Excellent, 4 = Meets Specification, 3 = Minor Defects, 2 = Major Defects, 1 = Not Consumable.
 NOTE 2: If the shelf life is longer than 5 days, additional column will need to be inserted for the additional days.
 NOTE 3: Weights of packaged products should be checked at the end of shelf life, either as stated on the label or if not labelled just before product is not consumable (eg Quality Score 2).
